Full Marks : 100
Pass Marks : 40

SECTION - A
(70 Marks)

Marks for each question is indicated against it.

Directions (Questions No. 1-6): Read the passage carefully and answer the questions that follow it :

Practically anyone who dares to say a word in favour of English in India says it as though he/she was interested purely in the utilitarian aspect of the matter. The English language is to be taught : we need not bother about literature. English is to be taught as a library language - that is to say, as something you use in the library, a table lamp to be switched on wheb you enter the august building and turned off when you leave it - in no circumstances to be carried away, as outside the library there will be no plug for this lamp to function. It may be used as a pair of chappals, necessary in the streets - but to be left in the passage or in the verandah when you enter the house. There are highly efficient ways of acquiring skills in its usage by vocabulary control and the structure method and no feeling need ever be involved at any stage. Multiple choice tests where one has to do is fill up blanks with 'yes' or 'no' will save both the examinee and the examiner a lot of time and a world of trouble.
